

JOÃO FRANCISCO DOMINGUES DE M. E SILVA

Graduate Student of Electrical Engineering

EXPERIENCE

Wabtec Corporation (locomotive manufacturer)

Quality Intern 📅 Jun. 2025 - present

- Development of process improvement projects in the storage and locomotive maintenance workshop. Implementation of 5S and Lean Manufacturing concepts in these projects.
- Emission of non conformity reports of parts and systems of the locomotives. Work with technical drawings and comparison with physical materials. Analysis of tendencies of the non-conformities and elaboration of action plans to eliminate future problems.

Department of Electrical Engineering - EESC-USP

Intern of photovoltaic systems 📅 Sep. 2024 - Jul. 2025

- Development of project and descriptive documents for the photovoltaic installations in the São Carlos campus of the University of São Paulo (USP). Photovoltaic modules, inverters, systems of measurement and protection.
- Use of AUTOCAD to create 2D diagrams and one-line diagrams. Knowledge of technical norms such as ABNT and ANEEL. Use of PVSyst software to design the PV systems.
- Cost analysis, maintenance and update of documents, organization of technical visits and other administrative activities for the USP Energy Transition Work Group.

Ambar Tech (civil engineering firm)

Quality analyst 📅 May. 2024 - Oct. 2024

Quality intern 📅 Mar. 2023 - May. 2024

- Development of budgets, cost analysis of projects, use of Revit and AUTOCAD for visualization of received projects, comparison of traditional and the company's construction methods.
- Data analysis and creation of dashboards to inform on the warehouse, purchases, sales, production, payment of salaries and benefits. Using tools such as RP TOTVS Protheus, Salesforce, Excel, Google Sheets, PostgreSQL, Power BI, LookerStudio.
- Participation in process improvement projects in the areas of warehouse, purchases, production. Creation of cronograms and tools for the application of these improvements.

English teacher

Private classes 📅 Jan. 2022 - Mar. 2023

- Classes on conversation, grammar, vocabulary.

EESC-USP Tupã (Electric Formula SAE Team)

Electric System Director 📅 Jan. 2021 - Feb. 2022

- Leadership of a 20 person team, working in the project, manufacture and validation of the electric systems of a race car for the Formula SAE Brasil competition.
- Coordination of the team, inspection of projects, safety in manufacture and tests of the car, decision taking related to engineering, costs, manufacturability.

Powertrain manager 📅 Dec. 2019 - Dec. 2020

Powertrain member 📅 Aug. 2019 - Nov. 2019

- Work in an electric race vehicle with its motor control. Use of knowledge in modeling of dynamic systems, programming, vehicle dynamics, MATLAB, Simulink and automotive simulation softwares.
- Leadership of a team of 5 members, education of new members through organization of courses and classes.

ABOUT ME

I am at the end of my university degree and seeking an internship to contribute to my professional and personal formation. I have ample experience working in a team including as a leader, and I believe I can learn new things fast and efficiently given the necessity, and with little preparation I can organize my thoughts and pass along what I know.

EDUCATION

Electrical Engineering - Emphasis in systems of energy and automation

EESC-USP 📅 2020 - present

Mechatronics Engineering

EESC-USP 📅 2017 - 2019 (transfer)
